WAYPOINTS

The primary objective of WAYPOINTS is to provide the quickest, most cost-effective service rooted in expert professionalism and armed with local knowledge and contacts.

To achieve this, The GMS Technical Services Department has set up a network of professional maritime associates providing a full range of shipping-related services. The network consists of experienced and established organizations covering all major shipping hubs. These professionals have been carefully chosen and are well equipped to undertake, perform, and satisfactorily complete services on a worldwide basis.

GMS has offices located in Connecticut, New Jersey, Virginia, Texas, California, Panama, Greece, Italy, Singapore, China and Japan.

SERVICE LOCATIONS AND REGIONS

To ensure that our offered services are global, the GMS Technical Services Department has established a network of representatives at principal ports strategically located at:

U.S. FLAG TOWING VESSEL - 46 CFR SUBCHAPTER M APPROVAL

Third Party Organization (TPO)

In July 2021, GMS TS received United States Coast Guard approval as a Third-Party Organization (TPO) to conduct audits and surveys for U.S. towing vessels. GMS TS is approved to:

- Conduct audits of a Towing Safety Management System (TSMS) and the vessels which the TSMS applies to verify compliance with the applicable sections of 46 CFR Subchapter M (Sub M).
- Issuing TSMS certificates to an owner or managing operator who is in compliance with 46 CFR Part 138.
- Conduct surveys of towing vessels to verify compliance with 46 CFR Sub M; and
- Issue survey reports detailing the results of surveys carried out in compliance with 46 CFR Part 137.

For more information see [here](#).

PERSONNEL

GMS has qualified and experienced personnel strategically located in the U.S. and several major ports world-wide. Our personnel include certified ISO 9001 and 14001 Auditors with extensive experience in various audits, inspections and training. They are former Masters, Chief Engineers, Class Surveyors, Flag State Inspectors, U.S. Coast Guard personnel and Port State Control officials. Several have held positions of senior management in Technical and HSSEQ departments with major ship operators.

Over the years GMS Technical Services personnel have attended hundreds of vessels to conduct inspections, audits, training, investigations, independent assessments, and compliance checks.

SERVICES

GMS Technical Services personnel regularly conduct the below described services for several shipping companies located around the globe.
